

Healthcare Administration Training Program

GALAXY
MEDICAL COLLEGE

Healthcare Administrators plan, direct and coordinate health services. They are responsible for the overall management and oversight of healthcare organizations; they can easily manage an entire facility, a specific clinical area, or a medical practice. They work closely with physicians and other healthcare workers to ensure that the healthcare facilities day-to-day operations meet regulatory guidelines. They also design facilities and manage operations of today's leading healthcare practices such as hospitals, nursing homes, long term care facilities and clinics.

Change Your Future.
